**LOT 2512 - Cattier Superfine Green Clay Powder 1 Kg**

### Description

Superfine green clay powder from Cattier is composed of montmorillonite illite and kaolin. It can be used to make clay paste or clay water. Clay has been renowned for its many virtues for millennia. Superfine green clay from Cattier can be used for skin care in a paste or poultice. Clay is absorbent as well as purifying. It is therefore ideal for carrying out cosmetic treatments on combination to oily skin. This type of skin suffers the consequences of too much sebum production the substance emitted by the sebaceous glands and which serves to constitute the hydrolipidic film. The skin is oily marked by shine its pores are dilated. Green clay applied as a mask will absorb excess sebum and regulate its formation while eliminating impurities and toxins and stimulating cell renewal. Superfine green clay from Cattier can also be used as a poultice to relieve joint pain caused by osteoarthritis. Finally it can also be used to make clay water which will soothe heartburn and modulate transit.
